PETARDS GROUP PLC

INTERIM RESULTS ANNOUNCEMENT

Petards Group plc ('Petards'), the AIM quoted developer of advanced security and surveillance systems, reports its interim results for the six months to 30 June 2011.

Highlights

- Revenues of £5.2m (2010: £5.3m)
- Gross margins 40.5% (2010: 41.1%)
- Profit before tax of £5,000 (2010: £115,000)
- Basic and diluted earnings per share of 0.08p (2010 as restated: 1.81p)
- Net cash inflow from operating activities of £0.4m (2010: £0.9m outflow)
- Net debt of £1.8m (31 December 2010: £2.0m)

Commenting on the current outlook, Tim Wightman, Chairman, said:

"Our order prospects remain encouraging with a number of large UK programmes in both the rail and defence markets having now obtained Government approval. However, the indicated delivery schedules of trains on the prospective large rail projects mean that those would be unlikely to have any material impact on revenues until 2013.

In the shorter term, the increasing global economic uncertainty over recent weeks leads us to be cautious over the timing of customer order placement for our products although we believe those orders will be secured. Despite this we expect year-on-year revenue growth in 2011, although that growth will be lower than previously expected."

Chairman's Statement

Overview of the Results

The financial information contained within this interim report is based upon the Group's unaudited results for the six months to 30 June 2011.

In the first six months of 2011 the Group performed ahead of our expectations albeit on lower than expected revenues. Profit before tax for the period was £5,000 (2010: £115,000) on revenues of £5.2m which remained at a similar level to those achieved for the same period last year (2010: £5.3m). The profit after tax was £5,000 (2010: £115,000) and both basic and diluted earnings per share were 0.08p (2010 as restated: 1.81p).

Our revenues in June were approximately £0.3m lower than expected due to a major fire at the end of May at one of our key suppliers which impacted upon deliveries of our Transport products. Alternative suppliers have been brought on stream and shipments of product have now re-commenced. This interruption of supply has necessitated some amendment to customers' build schedules which will have some effect on our full year revenues of Transport products.

Overall gross margins were 40.5% and while slightly lower than those achieved in the same period last year (2010: 41.1%), were higher than in the second half of 2010 and were ahead of our expectations.

Cash generated from operations resulted in a £0.4m inflow in the period (2010: £0.9m outflow) and the Group's net debt at 30 June 2011 was £1.8m (31 December 2010: £2.0m).

Operating Review

During the period we completed deliveries of the eyeTrain equipment that is installed on the Electrostar EMU trains that Bombardier are supplying to National Express East Anglia and the first of those trains entered into service on Stansted Express services. Initial deliveries were also made to Transys Projects and Bombardier for the vehicle upgrades they are undertaking for Southeastern Trains' fleet. Revenues from eyeTrain products were slightly lower than the first six months of 2010 due to the impact of the fire referred to above.

At this stage last year I commented upon the well publicised deferral of the Intercity Express and Thameslink new train programmes arising from the UK governments Comprehensive Spending Review. We are pleased that during the first half of 2011 the Department of Transport has given approval for both of those programmes and confirmed Hitachi and Siemens as the preferred bidders as these are important projects in which we would hope to be involved.

Revenues from Provida products were similar to those experienced in the first half of 2010 and continue to be affected by significant budgetary pressures faced by UK police forces. Outside of the UK we have been pleased to receive additional orders from new partners we established last year and have identified a number of strong prospects for the future.

While the overall defence market remains challenging, revenues were up on the same period last year. Another positive was that in June we received our first order for electronic countermeasures systems since the Strategic Defence and Security Review was undertaken. The upgrade forms part of the Puma helicopter life extension programme and will integrate existing systems to significantly improve the Defensive Aids Suite on the aircraft. We are also encouraged by the announcement in July of the Government's commitment to provide increased funding for the MoD's equipment budget, as two of the programmes benefiting from this are the upgrades to Warrior armoured vehicles and the acquisition of Chinook helicopters, which are platforms to which we have previously supplied equipment.

Research and Development

A key element of the Group's growth strategy is its commitment to its product development programme and capitalised development expenditure in the first six months of 2011 was £0.1m (2010: £0.2m). We continue to invest in our products with the resources available to us.

Capital Reorganisation

At the General Meeting held on 30 June 2011 a special resolution was passed by shareholders to undertake a capital reorganisation, details of which are set out in note 4 of this Interim Results Statement.

Outlook

Our order prospects remain encouraging with a number of large UK programmes in both the rail and defence markets having now obtained Government approval. However, the indicated delivery schedules of trains on the prospective large rail projects mean that those would be unlikely to have any material impact on revenues until 2013.

In the shorter term, the increasing global economic uncertainty over recent weeks leads us to be cautious over the timing of customer order placement for our products although we believe those orders will be secured. Despite this we expect year-on-year revenue growth in 2011, although that growth will be lower than previously expected.

Each New Consolidated Ordinary Share was then sub-divided into 100 New Ordinary Shares of 1p each and 9,900 Deferred Shares of 1p each.

Following the reorganisation, the Company's issued share capital comprises 6,367,100 Ordinary Shares of 1p each and 630,342,900 Deferred Shares of 1p each. The Ordinary Shares have equal voting rights. The Deferred Shares have no voting rights and are not entitled to any dividends and have no other right or participation in the profits of the Company.

5 Earnings per share

Basic earnings per share is calculated by dividing the profit for the period attributable to the shareholders by the weighted average number of shares in issue. The calculation of diluted earnings per share assumes conversion of all potentially dilutive ordinary shares, all of which arise from share options.

The calculation of earnings per share is based on the profit for the period and on the weighted average number of ordinary shares outstanding in the period.

The weighted average number of ordinary shares for the 6 months ended 30 June 2010 and the year ended 31 December 2010 have been restated to reflect the reorganisation of the Company's share capital on 30 June 2011 described in note 4.

Diluted earnings per share is identical to the basic earnings per share. None of the share options are dilutive as the exercise prices are higher than the average market price of the shares.
