

kestrel 18

The Kestrel 18 is a high quality video surveillance camera with automatic day/night setting which maintain the best possible image quality for video evidence.

For use in both surveillance and ANPR applications the camera can be fitted on our pan & tilt system for complete movement and control.

Feature include:-

- Suited for internal vehicle mounting.
- High quality colour/mono camera module with integrated 18x zoom lens.
- 1/4-type Ex-view HAD™CCD offering high picture quality, low light efficiency and a variety of functions.
- Ideal for demanding mobile video applications.
- RJ45 connection provides a quick and easy replacement to existing ProVida system.
- Exceptional low light sensitivity makes it an excellent choice for surveillance both and ANPR applications.
- Preferred camera choice where VOSA safety guidelines do not apply.
- GUI (Graphic User Interface) available to download via website for easy set up and optimisation.

SPECIFICATIONS

General

Dimensions	65 x 65 x 120 (whd)mm
Weight	600g
Operating Temperature	-0°C to +50°C
Storage Temperature	-20°C - 60°C
Environmental	Internal
